

Work for an **international startup** company.

Change the world for the better. If that's what you want join us as

## Senior Software Developer Java (m/f).

### WE are ...

an ambitious **FinTech startup from Germany** with operations in Kampala. Our mission is to **revolutionize the microfinance sector** in Africa. Our solution has already won several awards, plus **reputable international partners** back our operations. For more information visit [awamo.com](http://awamo.com).

### WE need ...

a highly motivated and experienced

## Senior Software Developer Java (m/f)

at our **Kampala office**.

### YOUR challenges ...

- \* **develop our platform (Java based) in accordance with our business requirements**
- \* align with the product management team about features and priorities
- \* take ownership of one or more modules in our architecture:
  - ⇒ biometric authentication server
  - ⇒ customize our transactional backend (open source, Java) by developing our business process engine & API
  - ⇒ development & implementation of an ETL tool and analytics framework (with some R/Python stuff)
- \* participate in the full project life cycle from design to go-live and support
- \* improve **automated testing** procedures
- \* **optimize your code** after deployment
- \* **write documentation** for the platform and APIs

We follow an agile development process, so experience in an agile working environment is a must-have.

### YOUR skills ...

- \* **you can teach and learn skills, but not attitude.** So we're hiring for attitude in the first place. Be hungry, be agile, be enthusiastic about what you do!
- \* a master's degree in computer science
- \* **3+ years working experience** in developing software in agile teams (source code and build management, testing, continuous integration)
- \* bank/financial industry experience and/or emerging markets experience is a plus
- \* experience with several of the following tools/technologies:
  - ⇒ JEE and Core Java,
  - ⇒ REST services and APIs
  - ⇒ Databases (xSQL)
  - ⇒ AWS (Elastic Beanstalk, EC2, S3, RDS)
  - ⇒ Netbeans/Postman
  - ⇒ GitHub/BitBucket/Jiira
- \* **strong analytical skills & structured approach to work**
- \* fluency in English, German/French is a plus

### WE offer ...

- \* a highly motivated and professional team
- \* responsibility and room for your expertise
- \* an attractive technology mix: mobile, biometrics, analytics
- \* a reasonable fixed salary
- \* a very attractive bonus component

### YOUR contact ...

for applications and any questions:
